

ACCESS TO COMPLETE COURSES ONLINE

One unique aspect of our program is that students have the flexibility to complete their entire course online. They can study from the comfort of their homes and access the syllabus and projects through our online platform. This convenient option is rarely offered by colleges, except for those with a partnership with Endiavolve.

TIMELY AND COMPREHENSIVE SYLLABUS COMPLETION

Unlike many colleges that often prioritize events and extracurricular activities over academics, we are committed to completing the syllabus on time. We understand the importance of focusing on the core curriculum to ensure students receive a thorough education.

INCLUSIVE SOFTWARE AND PROGRAMMING CLASSES

Our program includes software and programming classes worth 14,000 rupees in tuition fees. This unique feature sets us apart from other colleges that typically charge extra for such courses.

WEEKLY INDUSTRIAL PROJECTS

We believe in practical learning, which is why we offer weekly industrial projects to our students. This hands-on experience gives them a real-world understanding of the industry, a practice uncommon in many colleges that prioritize theatrics and superficial activities.

PRACTICAL AND PROJECT-BASED LEARNING ACROSS ALL ENGINEERING BRANCHES

Our classes cover subjects across all engineering branches, with 80% emphasis on practical and project-based learning and 20% on theory.

ENTREPRENEURSHIP AND STARTUP COURSES

In addition to academic subjects, we provide courses on entrepreneurship and startups to encourage students to pursue their own business ventures if they choose not to work in traditional jobs. This opportunity for self-employment is a rare offering not commonly found in colleges.

JOB-READY GRADUATES WITH INDUSTRY-READY SKILLS

Our classes are designed to prepare students for industry requirements, making them job-ready after graduation.

CONTINUOUS INDUSTRIAL TRAINING

Our program extends industrial training throughout all four years of study. We provide training on the software used in various industries and teach students how to work in different professional settings. This industry-specific training goes beyond the scope of a regular college education.

PERSONAL DEVELOPMENT PROGRAM (PDP)

We focus on the personal development of our students through our PDP. This program covers English speaking skills, effective communication in corporate settings, interview preparation, and handling clients. We aim to equip our students with essential skills beyond academic knowledge.

BUSINESS NEWS READING (BNR)

Through our platform, we provide weekly classes on business-related news and insights. Students gain awareness of how businesses operate and learn about the foundations of successful enterprises.

VALUE ADDITION: ADDITIONAL SOFTWARE AND PROGRAMMING CLASSES

To enhance students' industry-relevant skills, we offer extra software and programming classes worth 14,000 rupees. This additional training ensures that students stay updated with the latest technological advancements, increasing their employability.

GUARANTEED PLACEMENTS

Lastly, we provide guaranteed placements to our students, with minimum salary packages ranging from 3 to 5 lakhs per annum. This commitment to securing our students' future career prospects sets us apart from other educational institutions.

"AN INVESTMENT IN KNOWLEDGE PAYS THE BEST INTEREST." - BENJAMIN FRANKLIN

"BEST WAY TO LEARN: KNOWING THE REASON, MEANING, AND PURPOSE OF WHAT YOU'RE LEARNING." - ENDIAVOLVE
